## LMA

### Light Weight Polypropylene Monofilament Knitted Mesh

LMA type mesh fabric is constructed from clear homopolymer polypropylene monofilament. The design yields a dimensional stable and strong mesh.

LMA fabric is well suited for the manufacture of  
***Hernia Mesh***  
***Surgical Mesh***

or any devices intended to reinforce soft tissue.

TYPICAL PROPERTIES	
Monofilament diameter (mm)	0.13 (.005")
Fabric Weight (g/m <sup>2</sup> )	40
Thickness (mm)	0.50
Grab Strength (N)	Walewise 143 Coursewise 162
Elongation (%)	Walewise 84 Coursewise 58
Mullen Burst (N)	330

LMA is available in various standard stock sizes. Custom size and shape are available upon request. All fabrics are supplied sterile or non-sterile.

ISO-10993 Biocompatibility Data are available to customers upon request.
